Plug & Play

INCAST BOXES AND TRANSMITTERS

Revolutionize connectivity between your devices: more fluid, more interactive.

INCAST

Duplicate your screen and interact together on your devices

Share and receive content and interact between the screen and your devices

Usable on any type of connected device: interactive screen, PC, smartphone, tablet

InCast Features:

- Stream up to 4 pieces of content from your devices to the interactive screen and navigate from the screen
- Receive content from the interactive screen on your device and navigate directly from your device
- Connect a multitude of devices together to multiply broadcasts and project simultaneously on multiple devices
- Use your smartphone/tablet as a remote control to navigate the entire interactive screen and enjoy live photo and video features
- Set up shares and controls from the interactive screen

Any type of content: documents, applications, software, photos, videos

Available on Android and Windows

InCast PRO:

- All the InCast features on Windows with more possibilities!
- Annotate directly on your shared content
 - Broadcast up to 9 contents from your devices on the interactive screen.

INCAST HUB

INCAST HUB

IB-01

One box, a multitude of possibilities.

Annotate your content
& store your files

Turn your TVs, monitors
and projectors into
InCast displays

Android, closed network, hotspot.

Equipped with its own network, use InCast on its closed, password-protected network for maximum security or choose to use it on the local network. Take advantage of its hotspot to connect your devices.

Secure, it can operate
on its own network

Deliver your content
to multiple devices
simultaneously

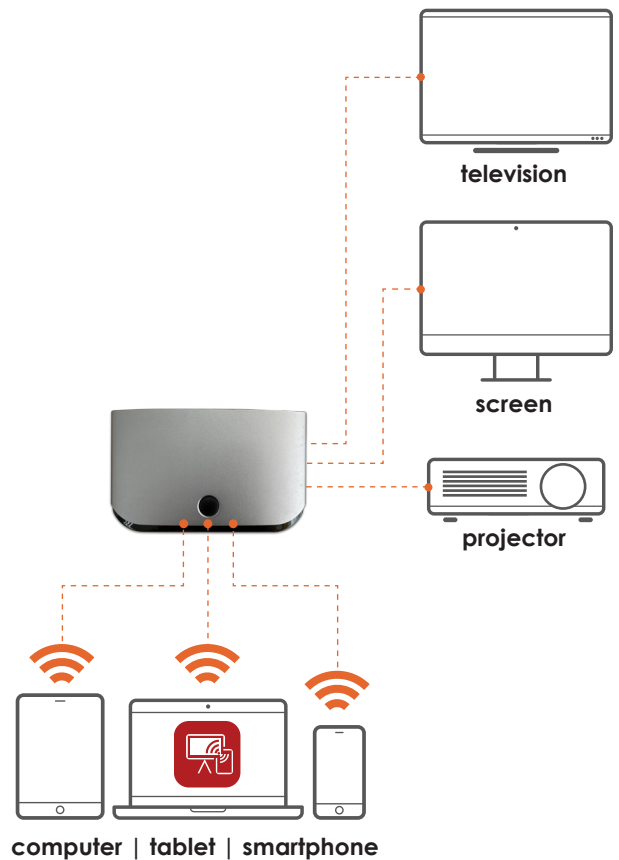

INCAST HUB

INCAST HUB

- 1** Make any monitor a receiver of your content with the HDMI plug (computer, TV, screen).
- 2** Stream the same content to multiple screens simultaneously as long as the screen is equipped with InCast.
- 3** Take advantage of multiple Android features:
 - Annotation on broadcasted content
 - Store any type of file (audio, video, photos)
 - Whiteboard
 - Screen capture
- 4** Broadcast up to 4 different contents simultaneously on a single monitor equipped with InCast.
- 5** Connect your accessories:
 - Your transmitters
 - Camera and speakers
 - Touch cable to benefit from the touch

INCAST TRANSMITTER

INCAST TRANSMITTER

TRS-05

Partner, share, collaborate.

InCast without installation
on your device

Share your screen in
one click

Quick and easy
pairing

Available on Android
and Windows

InCast wherever you are.

With one click, share content from your device to the interactive screen: software, documents, pdf's, photos, videos etc. Also run InCast between two interactive displays.

Take advantage of your display's speakers for high-quality wireless audio. With InCast PRO, you can also project from the interactive screen to your device.

INCAST PACK

Collaborate securely with each other through the closed network of the InCast Hub.

1 Pair

2 Plug in
